Plant Nursery Development

Project no.	LED-2017-IO-002			
Source of opportunity	First National Conference for Local Development			
Project name	Plant Nursery Development			
Governorate	Hebron			
Sector	Agriculture			
Investment Opportunity Owner	Nuba Municipality			
Contact information	Nuba Municipality Telephone : +97022585001 Fax: +97022585002 Email: Nuba_vc@yahoo.com			
Project estimated cost	500,000 USD			
Current investor contribution	100,000 USD			
Investment required	400,000 USD			
Jobs	Current	3	Potential	10
Project status	Development of Existing project			
Project ownership	Nuba Municipality, Project Area : (B)			

Project Description:

Development of the Agricultural Nursery business over available 7 dunums, with availability of 100,000 water liters treated daily from a local wastewater treatment services.

The nursery was established by the end of 2016 in cooperation with the Palestinian Hydrogen Company, Ministry of Agriculture, and Agricultural Work Committees and the project initially funded by the Dutch Cooperation Foundation in Alsayel area ,(north west part of the town of Nuba).

Agriculture Highlights:

A leading sector of the Palestine economy is the Palestine Agriculture. The Palestine Agriculture symbolizes a major constituent of the GDP of the economy. The agricultural sector in Palestine gives the possibility of employment to a large number of people of Palestine.

Agriculture in Palestine is the chief earner of the overseas exchange and provides the essential needs of the most of the local population. Agriculture in Palestine is separated into rain-fed and irrigated cultivation.

The Palestinian agriculture zone shares the joint distinctiveness of both concentrated irrigated farming as well as the widespread rain-fed farming which is prevailing in the highlands of the West Bank. The rain-fed farming forms the primary cultivated area of the total cultivated Palestinian land.

The cultivation of fruit trees is the key segment of production of plant in Palestine. The main fruit trees of Palestine are grapevines, olive trees, citrus, figs, almonds. In the West Bank of Palestine the grapevines form the second among the major fruit crops. In Palestine more than 30 different vegetable crops have been planted.

The type of agriculture that takes place in Palestine is yearly and cyclic agricultures such as grains and vegetables. In the Gaza Plain, Marj Ben Amer and some of the inner plains grain plantation was grown.
